ABOUT ME

I am passionate about computer science with a strong interest in software development and technology. I have dedicated time to exploring systems and programs, developing a curiosity to understand and improve their functionality.

In addition to my interest in technology, I have a strong inclination toward music, which has led me to explore various instruments such as the piano, guitar, and ukulele, as well as participating in musical creation and production. These hobbies complement my technical skills and experiences.

Recently, I have also worked with Blender to design 3D models and ventured into Unreal Engine to explore game programming and video game development.

EDUCATION

2022-2023

Science and Technology Baccalaureate

2023-2025

Multiplatform Application Development (DAM) vocational training at CEU FP.
